Max. Cable Ø	- mm
Fastener Ø	5.0 mm
M.W.L.	300 kg
B. L.	750 kg
Weight	30 g

**Product Information**

Lead blocks are a low profile solution for leading halyards or other rig sail controls back to cleats or jammers. Precision moulded Acetal sheaves running on Acetal or Torlon[®] ball bearings provide high performance & low friction. The 2-stage ball bearing system provides consistent performance over the full load range.

Back to Top Applications

- Typically used for halyards at the mast base.

Back to Top Materials

- Acetal ball bearings
- UV stabilised Acetal sheave
- Grade 316 stainless steel load housing
